

PhD is a project – My results as monograph and publications are the outcomes that evaluates its success

This document is to create a work packages and Gantt chart that will help me focus on the path and improve

1. Find and sort the literature I have read and classify them based on topics
2. What are the topics I am working at the moment?
 - a. Multi-Modal navigation and communication – as an aid for safe operation
 - b. What raytracing mm wave results to sub-Ghz can add value to the communication estimation
 - c. What is multi-link for drone operations and how it is relevant with network coding what's the novelty
 - d. Can Communication aid UTM?
3. Test setup – validation plan

12/11

PhD timeline

Nov-25 - Dec-25

Jan-Mar'26 | Apr-Jul'26 | Aug-Oct'26 | Nov-Dec'26

Jan-Mar'27 | Apr-Jul'27 | Aug-Oct'27 | Nov-Dec'27

Jan-Mar'28 | Apr-28

Thesis Writing
by completion

WP-Task → final defense

WP1: Project Management
Review, Administrative work
presentation, business trips.

WP2: Literature | gaps |
→ references, SOA
→ concept, links
data

WP3: Multilink comm.

WP4: NTN (new
nw tech)

WiFi mesh 5G Satcom option

Simulation Omnet++
testbed.

WP3.1: Simulation

WP3.2: Actual test bed and
data collection

WP5: Collaboration with AirMetuo

→ **T2** **T5** **T8** **T10** → CNS cluster

WP6: - data processing / final data optimization
demonstrator.

allaboutquarks.de

WP4: Writing { Papers
Monograph.

Gantt chart
